

LIS - Land Information System

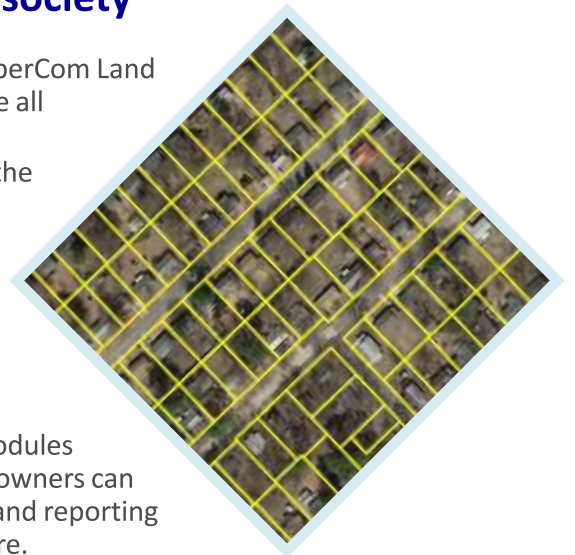

Empowering you to introduce governness and economical growth to your country and to its society

Bringing a mature and holistic approach to land management, the SuperCom Land Information System (LIS) is an all-inclusive solution designed to handle all aspects of your country's most important asset.

Built over a shared and linked GIS platform, the SuperCom LIS has all the tools and modules for timely integration and for definition of comprehensive workflows over a friendly interface.

Providing a full and closed-transparency picture of all land stratas, LIS is designed by experts with proven experience and who have already created and integrated a number of LIS systems on a global level, including in Africa and South America.

Made to promote harmonistic governness and increased economical security on a national and personal level, SuperCom LIS innovative modules include secured land-titles certification, a secured portal where land-owners can handle their land-related affairs and pay their bills, strong audit trail and reporting capabilities and a full documentation management solution and more.

LIS - Land Information System

From project initiation and implementation on to daily activities such as registration, the SuperCom LIS offers the following:

- Full private or massive registration capabilities
- Cadaster management
- Revenue generation
- Public portal
- Online application submission and tracking tools
- Flexible interfaces to different external databases
- Secured certificates
- Workflow management
