Magna™, the platform for secure identity solutions

Delivered by ΣID, and a secure operational backbone, the Magna™ software platform has a modular and layered architecture based on a core registry that interfaces with services used for many solutions.

Magna™, comprehensive and secure services

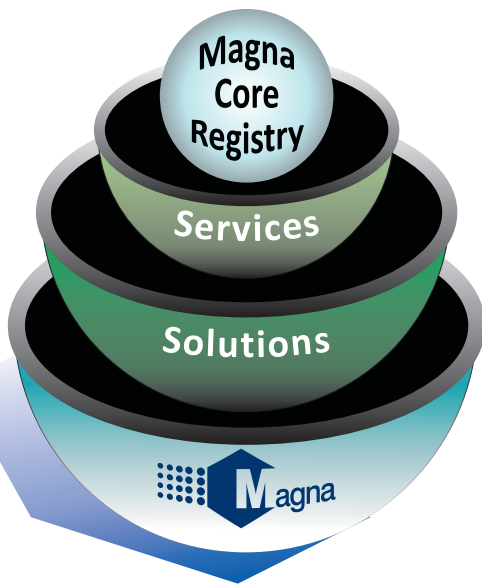

Provided online, offline, by mobile, in offices or remotely, Magna™ services include:

- Registering people, capturing their biometric and biographic identity
- Business intelligence and watchlists
- Payments and fee collections
- Issuing personalized smart ID documents

Magna™, one platform for many solutions

Answering major compliancy requirements, Magna™ implements the following cost-effective, end-to-end and turnkey national ID solutions:

- Population registries, e-Government portals and censuses
- Documented civil lifecycle events
- Passports, border control, immigration, visas and resident cards
- Transportation including vehicle and driver licensing and toll payments
- Law enforcement with remote ID authentication and ticketing
- Social security benefits and pensions
- Voter registration and comprehensive ONE VOTER = ONE VOTE election management
- Healthcare and education
- Land and housing registries

<p>100M PERSONALIZED DOCUMENTS</p>	<p>3 MONTHS to IMPLEMENT</p>	<p>PROJECTS in 20+ COUNTRIES</p>
<p>50M SMART CARDS</p>	<p>30 YEARS EXPERIENCE</p>	<p>30 MINS DOCUMENT ISSUE PROCESS</p>

The robustness for today's needs with the durability for tomorrow's technologies

Economic growth

Enhancing a nation's economy with new jobs and technologies, ΣID leads to autonomous management by delivering in-depth knowledge transfer and professional support. The Magna™ enforced nationwide ONE PERSON = ONE IDENTITY standard ends fraud and duplicate credentials and cuts unnecessary government payouts.

Making people matter

Documenting a nation from birth, death and life in-between, Magna™ queue-cutting customer-oriented solutions make people matter. Sharing inter-office information, Magna™ intelligence enables governments to plan the future, control who is entering or leaving their borders and acts as a revenue-building tool for improved tax collection.

New technologies

Fully cyber-secure and continually evolving technologically, Magna™ offers:

- mID and mDL mobile identification
- Multi-modal ABIS (Automated Biometric Identification System) with fingerprint, facial and iris recognition
- Dedicated mobile identification and verification devices
- Paperless processes
- Multi-lingual Soundex
