

Robust Tracking and Control of Facility Activities **Zoning-in to a more precise monitoring solution**

A PureTag, PureReader and PureMonitor trio with an optional personnel tag tracking solution, PureSecurity Inmate Monitoring provides crucial zone-by-zone information on inmate movement at detention centers. Worn by all inmates and indicating their location, the comfortably-smart PureTag RF ankle bracelet offers comprehensive assembly and is both sturdy and waterproof.

Continually interfacing with the PureMonitor software, PureReaders are strategically positioned throughout a facility and read and transmit PureTag signals over secure cellular and Wi-Fi communication lines. Displaying a cyber-secure and continually updated view of a facility, PureMonitor enables defining zones, assigning individual inmate schedules, and generating warnings and alerts on out-of-zone movements throughout the detention center.
