Safend Reporter   The knowledge to control
The power to prevent

Giving you the knowledge you need to prevent data from leaking out, Safend Reporter provides full statistical and indepth information about your company's endpoints.

Designed as a compliant solution, Reporter already answers to Sarbanes Oxley, (SOX), HIPAA, PCI, FISMA, BASEL II, UK Data Protection Act (DPA) and other stringent requirements.

Part of Safend Data Protection Suite, Reporter automatically pulls strategic and periodic information into reports and distributes them to defined recipients. Pinpointing intentional and unintentional misuse, Reporter can generate both built-in reports and those customized by the administrator. Easily understood, each report is set in a comprehensive interface and has a number of drill-down options. Generally arriving as a .pdf file, Safend reports can also be exported into other recognized formats.

Safend DPS, the Data Protection Suite

Protector:
controlling port
and device endpoints
and media encryption

Encryptor:
transparent encryption
on laptops and PCs

Inspector:
inspects, classifies and
blocks sensitive data leakage
